Get It **Soldered**

Weller Efficiency – the most powerful station in its class

Weller®

Get it **soldered**

Just switch on the new WE station and start soldering. Weller introduces a new soldering station designed for education, advanced hobbyists and professional users.

EASY TO USE

POWERFUL

Digital LCD screen
› **Easily monitor** your preset levels

Menu control buttons
Intuitive navigation
› Temperature
› Password protection
› Standby and auto setback modes

Temperature stability and lock
› **High quality and repeatable** results

Standby Mode
› Equipment **protection** and **efficient** energy use

Power switch on the front
› **Convenient on/off control**

70 W power station
› **70 W power** housed in functional new design
› **Fast heat-up** and **recovery**

70 W soldering iron
› **More power**, more control
› **Toolless tip change** solution
› **Less hand fatigue,** more precision

ET tip family
› Choose from a **wide range of longlife ET tips**

RELIABLE

New reinforced safety rest
› Provides **extra stability** and **safety**

Heat-resistant silicon cable
› **ESD safe** for professional use

ESD SAFE

Weller 350 °C 350

Weller

Weller® WEP 70 23V/70W

Ergonomic handle
› **Less hand fatigue,** more precision

AND STILL   COST EFFICIENT

ADVANTAGES AT A GLANCE

Powerful, user friendly and cost-efficient
› Powerful with 70 W – gets your soldering job done faster
› Easy to handle high performance iron
› Intuitive navigation
› Low total cost of ownership

Maximum reliability and protection
› ESD safe station, iron, and heat-resistant silicon cable for safe handling
› Reinforced safety rest for secure iron storage
› Temperature stability (+/- 4°F, 2°C) and temperature lock protects tips and components, affording a consistently high quality process with repeatable soldering results
› Standby mode and auto setback conserves energy, protects equipment
› Password-protected to preserve settings

Get it **soldered** with the WE soldering station...

Gets your soldering job done faster

> Digital 70 W soldering station, 40% more powerful than existing 50 W stations in the same category. This allows the iron to heat up fast and to provide a fast recovery time – gets the job done quicker with more efficiency and precision.

Easy to handle high performance iron

New high performance 70 W soldering iron with an ergonomic handle and easy toolless tip change solution:

> The iron was designed in a light weight pencil style with a co-molded grip.

> The new and improved safety rest has additional support so that the iron is stored securely in place in between use.

Intuitive navigation

> The station is designed in a state-of-the-art housing with front panel power switch for easy access.

> The digital WE soldering station features an easy-to-read LCD screen with 3 push buttons providing easy temperature control, a front switch for easy on/off and intuitive navigation through all new SW features.
Easy tip change and low total cost of ownership

> Change hot tips out by hand by twisting the plastic knurled nut on the soldering pencil without an additional tool.

> The soldering set and the genuine Weller ET series tips provide the best performance and an extraordinary lifetime.

> Choose from a wide selection of existing high quality, affordable, genuine Weller ET tips. Here's where the station starts to pay for itself.

...with **improved features**

Safe handling

> ESD safe

> Both station and iron have passed inspection and have received a Certificate of Compliance for electrical safety (CE, UL)

> The flexible silicon cable withstands heat because it meets the highest industry standards for mechanical strength (overload/stress). Because it's certified ESD safe, the WE station can be used for professional use.

Temperature stability

> +/- 4°F, 2°C (even better than MIL Spec)

> Temperature lock stabilizes heat levels to protect tips and components and aid in producing uniformly high quality solder joints - reliable and repeatable soldering results

Standby mode

> Station automatically powers down to a given temperature when not in use

Automatic set-back

> Sets temperature back automatically when not in use to save energy and increase tip lifetime

Password-protected

> All settings can be secured with a password, so that predefined settings can be maintained in order to ensure process quality
